

# FFP-Mounting

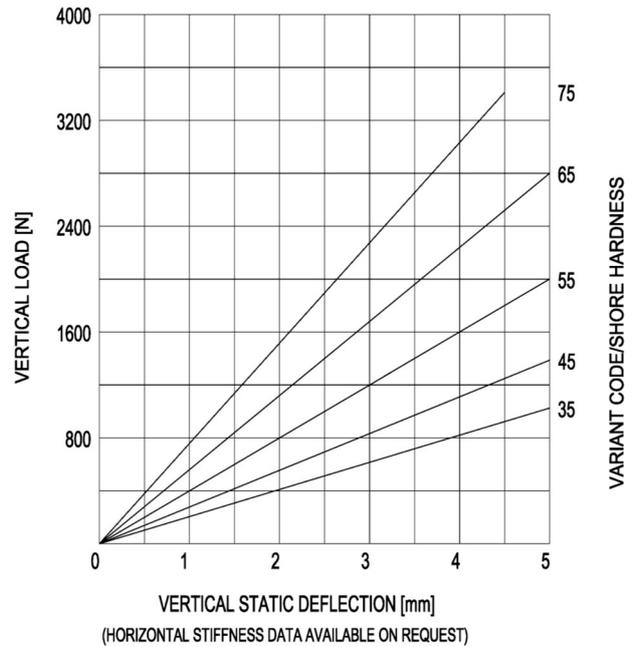

## type 20-FFP-1

Max. 350 kg - 5 mm - 7 Hz

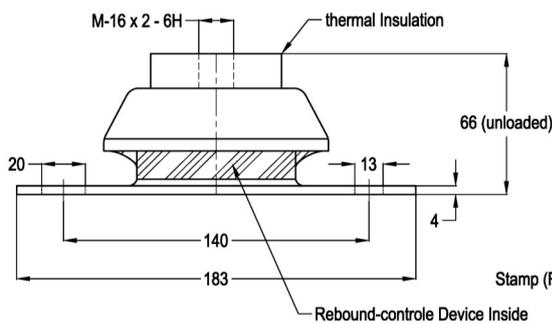

**FFP-type** Flexible Fixed Points are used to support both vertical pipe sections and exhaust silencers. They are fitted with a thermal insulating plate for heat protection and feature protection against complete loss of support in the event of mechanical or fire damage. FFP-1 elements are also available with M12 inner thread and in SS-316 stainless steel. Customers are recommended to contact our application engineers for further technical information on products and applications.

Applications: supporting and stabilizing pipe sections and exhaust systems.
